REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-2, 4-12 and 14-16 are allowed as amended

The closest prior art by Chikuni et al (US 5,755,867) teaches a coating solution and a layer containing the components of the applicants, wherein the best ratio of components in the solution containing 60mol% dimethyldimethoxysilane (MW120.2) (Formula-1), 10 mol% decyltrimethoxysilane (MW 262.5) (Formula-2) and 30 mol% tetramethoxysilane (MW 152) (formula-1) results in 18.3 parts by weight of Formula-II component in the composition. Applicant's arguments filed 07/19/2007 have been fully considered. The prior art of record neither teaches applicants composition and a semiconductor device comprising the internal porous film derived from the composition nor fairly suggestive of it. An updated search did not result in any new prior art of record that either teach or fairly suggest applicants composition or device containing the film.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
